Jefferson County PUD

To learn more about NoaNet’s Community Broadband Solutions program and how we can support your community’s broadband efforts contact our Community Outreach Manager Claire Ward at (816) 519-2370 or cward@noanet.net and visit us at www.noanet.net
Invest in your community network. We’re here to help.

Since 2000, Northwest Open Access Network (NoaNet) has operated as a non-profit mutual corporation providing wholesale telecommunications transport and services to bridge the digital divide in Washington State. NoaNet was founded in 2000 to address a need for quality and affordable high-speed broadband in rural areas of Washington state. Since then, it has operated a reliable public open-access broadband communication networks which now encompasses over 3,300 fiber miles that provide rural as well as metro areas access to broadband services.

NoaNet’s Community Broadband Solutions program is prepared to work with you and your community to understand and implement a community broadband project. From feasibility assessments and demand aggregation to business modeling and construction we will leverage our experience in telecommunications with your understanding of your community’s needs to get you from good idea to great broadband network. When your network is complete, we can even work with you to monitor and maintain the infrastructure to help cut down on staffing and administrative costs.

NoaNet is Washington’s non-profit telecommunications provider. We are here to serve you! Let us know how we can help.

Outreach and Education

Education is pivotal, but takes a lot of time. NoaNet will work with you to reach out to your community and educate on the power of broadband. We’ll also gather and chart data to organize and operationalize the goals of your community.

Engineering

Leave the planning to our experts. NoaNet’s highly qualified engineers will create a custom network plan for your community’s unique needs. We’ll leverage our experience alongside your knowledge of your community to create a perfect fit.

Construction

NoaNet has you covered when it comes to coordinating and executing the build of your network. We have relationships with qualified companies who can execute your aerial or underground fiber network build. We’ll oversee that it all goes smoothly.

Maintenance & Monitoring

Our Network Operations Center (NOC) can be the eyes and ears on your Network. Staffed 24/7/365, in the event of a problem, we act immediately to troubleshoot the issue, notify the appropriate personnel and minimize the amount of downtime.

5-6k
Value that Fiber-to-the-home adds to a typical house or condo.

62%
Percent of American who relies on the Internet to do their jobs.

42%
The annual increase in Internet traffic—year after year, for decades.

6%
Average increase in a home’s value when it is connected to broadband services through fiber optic cable.

24
Million Americans still lack access to terrestrial Internet services that meet the FCC guideline of 25/3mbps.

16%
The gap in broadband adoption and availability between rural and urban communities in the U.S.
